

I-YEL IDENTITY

PROJET 2024 - 2025

Narrative:

My mom is someone who I have been with for most of my life. I really felt bad for her cause taking care of 3 kids was hard and me and my siblings were quite the troublemakers when we were together. We always fought cause of stupid things and my mom was always tired of stopping the fights. The times we spent together are always fun even though things in our life has changed but it doesn't mean we will be apart. Our memories together will always be there for us like bad, fun, and sad memories but it describes our relationship that will always stay strong.

A letter to my mom:

Thank you Mom,

For always taking care of us even though we are hard to take care of. Driving us to places even though you are busy and taking us to amazing new places to eat and explore. Its always fun to hang out with you and talk to you about things that trouble us. Even though we get into arguments with you we still care about you.

You are someone I look up to for taking care of 3 kids that always bother you at morning and night. Thank you mom for believing in my talent and taking me home for practices that end at 5:30 to 6:00. Also for making sure all of us are safe when we go outside.
