Volunteer Benefits:

- **Identify any potential hazards in the working area.** While we strive to create the safest environment possible, it is impossible to eliminate all potential hazards when working outside in nature. Feel free to ask a park volunteer supervisor if you find a needle or something you do not recognize—do not pick it up!

- **What to Wear and Bring:** Wear clothes that can get dirty, long pants, closed-toe shoes (no flip-flops or sandals), layers for changing weather, and rain gear if necessary. Bring a personal water bottle and sunscreen.

- **Volunteer Benefits:** It's fun, healthy, and makes a difference! Opportunities to work alongside park staff and volunteers from diverse backgrounds, help care for our local national parks, learn about the rich history and resources, and connect with these special places and people.

- **Safety Considerations:** NPS and Parks Conservancy staff will provide you with a safe work environment and will identify any potential hazards in the working area. While we strive to create the safest environment possible, it is impossible to eliminate all potential hazards when working outside in nature. Feel free to ask a park volunteer supervisor for more information on these or other topics.

  - **Working in an Urban Environment:** You may encounter an angry or distressed individual during your service. Notify your volunteer supervisor immediately or call 911 in an emergency.
  
  - **Ticks:** Ticks are common carriers of Lyme disease. Though you are unlikely to come in contact with them in San Francisco, they are common in Marin and San Mateo counties. Check your clothes and body after working/playing outdoors.
  
  - **Yellow Jackets:** Yellow jacket nests are commonly found in trees and on the ground in natural areas. Yellow jackets are often difficult to spot, but if you see one, try to follow it back to a nest and clear the area. If you see multiple yellow jackets flying around an area, warn others about them. They are very protective of their homes and sting repeatedly if aggravated. If you disturb a yellow jacket nest, run away quickly in a zigzag pattern. If you know you are allergic, please take precautions for your safety.
  
  - **Poison Oak:** The oil in poison oak can cause a severe rash, especially if you are highly allergic to it. Everyone should learn to recognize poison oak and avoid it. To identify poison oak, look for three lobed leaflets, which come in a variety of colors (from green to red) and are sometimes shiny or glossy in appearance. If any part of the plant touches your skin, clothing, or tool, talk to the park volunteer supervisor for further instructions on decontamination.
  
  - **Heat Exhaustion:** Drink plenty of water while working! If you feel tired or lightheaded, sit down and rest in the shade.
  
  - **Sun Exposure:** You can get sunburn on a cloudy day. Wear sunscreen and a hat for protection.
  
  - **Tool / Back Safety:** Be aware of the tools you are using. Make sure you know the correct way to use and transport them. Keep space between you and other volunteers. To avoid repetitive motion stress, take regular stretch breaks. Use your legs when lifting or pulling heavy objects, and always try to avoid twisting when carrying or loading.
  
  - **Things You Might Find:** Golden Gate NRA, Fort Point, and Muir Woods are located in urban areas and have a military history. Be observant and avoid things like broken glass, rusty metal, hypodermic syringes, unexploded ordnance, and pet feces. Glass, metal, and other trash can be picked up (wear gloves!). Alert the park volunteer supervisor if you find a needle or something you do not recognize—do not pick it up!
